

# PHOTOGRAPHY CURRICULUM OVERVIEW

## Key Stage 3

## Key Stage 4

## Key Stage 5

### Transition Stage

### Foundation Stage

### Examination Stage

### Advanced Stage

The course is designed to take an absolute beginner in photography to a point where they could access professional practices.

There are two main components: Component 1 - students create a portfolio of work from three units of work built up throughout Year 12 and the start of Year 13. This will demonstrate their skills and creativity using digital and traditional darkroom photography. Component 2 - set assignment in which students are required to select one of several starting points provided by the exam board. They then have several months to develop a body of practical photographic work.
